- Learned the Angular and Ionic framework to build front end pages and components during release of new app for ios, Android and web in the first 6 months.
- Learned Firebase Functions and chart.js to build a dashboard to show login/register statistics to the founders of the business.
- Built the front end components for business and student subscription models to help increase revenue for the task board within the app by over 100%.

FULL TIME STUDENT (JavaScript|React|Node.js|Express.js)

Northcoders

Manchester, UK

2021 - 2022

- Built a user interface and an API for a news article site using JavaScript, React, Node.js and Express.
- Learnt React Native and TypeScript to collaborate on a mobile app that allows users to find local gigs.
- Best practices taught throughout including version control with Git, Test Driven Development and Pair Programming.

CUSTOMER SERVICE ASSOCIATE

Salary Finance

London, UK

2019 - 2021

- Handle all day to day collections contact with borrowers that are having difficulty making repayments.
- Learned about MailChimp to implement a new weekly campaign.
